New / Existing	Description
E	The garden project's goal is to engage the Rose Park community through gardening workshops, classes and events. Partners include Day-Riverside Library, U of U Lowell Bennion Center, SLC Urban Forestry Division, and SLC Parks & Recreation.
N	The school-based project will benefit not only students but surrounding businesses and apartment residents. Students will learn about biology, cooking and food preservation techniques through this project. Partners include City Academy, Action for Healthy Kids, West High School, and Western Garden Center.
N	The garden will be developed at Heritage Commons - the site utilized as "Olympic Village" during the 2002 Winter Games. Partners include Housing & Residential Education and Shoreline Ridge Community Council. Plans are to focus on organic gardening and provide gardening education to residents.
N	The garden is being developed at a new location in the Historic Sandy City neighborhood. Partners include Utah GARDENS and Good Shepherd Lutheran Church. Target is low-income families and individuals who wish to stretch their grocery dollar by supplementing with garden produce.
E	The project will provide stability and unity among residents of this low-income and highly transient Ogden neighborhood. Produce will be available on Sundays to those in need. Sponsors include Pioneer Ward (LDS Church) and Pioneer Lawn & Landscape.
E	The garden project located at Riley Elementary School has a strong focus on parental involvement. Students will have a chance to be more active and to try new fruits and vegetables. Produce will be distributed to students and their families. Partners include Slow Food Utah and the Parent Teacher Association.
N	The elementary school-based project will involve Biodynamic Farming methods of gardening. Students, staff, teachers and parents will maintain the garden and community workshops will be offered. Partnering with First Congregational Church and Utah Organics.
E	Enhancements will be made to gardens at Boys and Girls Clubs in Midvale and Murray. The gardening experience will be incorporated into academic lessons while gaining the opportunity for proper nutrition and physical activity. With the fresh produce, the onsite "Kid's Café" will provide healthy snacks and meals to low-income children, teens and families.
N	The project will provide opportunities for Fairpark residents to beautify and revitalize their community while benefiting from being physically active in the garden. Partners include First Step House, Of The Earth, People's Market, Reagan Outdoor Advertising and others.
N	The garden will be developed on a lot that has been vacant for 30 years. Raised plots will allow accessibility to those who have challenges working at ground level. Partners include Taylorsville Elementary School, Salt Lake Community College, and the City of Taylorsville.
